

Welcome to the Sample PDF for RAG Testing!

This document contains basic information about AI, chatbots, and document search.

1. AI stands for Artificial Intelligence and is used in many modern technologies.
2. Chatbots use NLP (Natural Language Processing) to understand user inputs.
3. Retrieval-Augmented Generation (RAG) combines search with generative models.
4. LangChain and OpenAI are common tools used for building smart applications.
5. Redis helps in caching and fast retrieval of data.
6. SQLite is a lightweight, file-based database useful for prototyping.
